### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher Parmelee on 6/17/2009.

The application has been amended as follows:

**Claims 1-7 and 28-29 have been canceled.**

### ***Allowable Subject Matter***

Claims 8-27, and 30-32 are allowed.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The overall claimed combination of a method comprising the steps of reading card indicia on a card presented by a customer to an automated banking machine, the card indicia including entity data corresponding to an entity with which the customer has an account; resolving network address data with the banking machine responsive to the entity data and data stored in a data store; and operating a browser in the banking machine responsive to the resolved network address data, to access at least one network address in a network, wherein the network address

Art Unit: 3691

accessed corresponds to an address of a server adapted to deliver documents corresponding to the entity with which the customer has the account is neither anticipated nor rendered obvious by the prior art.

The overall claimed combination of an apparatus comprising: a plurality of institution servers, each institution server associated with one of a plurality of financial institutions, wherein each institution server has at least one unique network address, and wherein each institution server is operative to deliver at least one document associated with the respective institution; a network in operative connection with each of the plurality of institution servers; at least one automated banking machine, wherein the banking machine includes a computer having a browser operating therein, a card reader and an output device in operative connection with the computer; wherein the automated banking machine is operative responsive to reading card indicia on a card read by the card reading device, to cause the browser to connect through the network to a network address of an institution server corresponding to the card indicia is neither anticipated nor rendered obvious by the prior art.

The applied references do not disclose that the browser is included in the banking machine. The web browser in Infoworld is located in the user's computer, not in the ATM. As such, Infoworld does not disclose a browser in the ATM. In addition, Anderson does not disclose or suggest an ATM or that the described browser is in operative connection to an ATM.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 3691

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
